If inhaled	Move to fresh air, keep warm and get medical advice. If breathing is irregular or stops, give artificial respiration (if possible give oxygen) and contact the local Emergency Services.
In case of skin contact	Remove soiled clothing, clean affected areas with copious amounts of soapy water. Do not use solvents (thinners ...).
In case of eye contact	In case of contact with eyes, rinse immediately with fresh water for 15 minutes holding eyelids open. Refer the victim to an ophthalmologist immediately and show the product label or this MSDS; this should be treated as an emergency in case of symptoms (redness, pain, visual problems).
If swallowed	If quantity is small (less than a mouthful), rinse mouth with water. DO NOT induce vomiting. In all cases, seek medical

attention.

4.2. Most important symptoms and effects associated with exposure

If inhaled	Possible drowsiness and dizziness. Risk of respiratory problems.
In case of skin contact	Redness, pain. The skin absorbs part of the ingredients of this product. Can cause dry or chapped skin.
In case of eye contact	Redness, watering, blurred vision. Risk of irritant effect on eyes.
If swallowed	Health risk even in small quantities. Product should not come into contact with foodstuffs.

FIREFIGHTING MEASURES

5.1. Extinguishing media Chemical powders, carbon dioxide and other extinguishing gases may be suitable for minor fires.

Recommended Special foam for polar liquids.

To avoid Water without additives.

5.2 Specific hazards during fire fighting Fire often produces a dense black smoke and vapours (may be invisible) heavier than air and spread along ground. Exposure to decomposition products (such as carbon monoxide or dioxide) constitutes a serious health hazard. Do not inhale smoke. Vapours may form explosive mixtures with air.

5.3. Advice for firefighters

Special protective actions
for fire-fighters

Use water to keep the containers exposed to fire cool. Heating will cause a pressure rise - with risk of bursting. Avoid naked flames or other sources of ignition in areas where product is used. Protect electrical equipment (risk of explosive zones). Dry residue stay highly flammable. Exercise caution when fighting any chemical fire. Prevent fire-fighting effluent from entering drains, watercourses and/or environment.

Special protective
equipment for fire-fighters

Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

6. ACCIDENTAL RELEASE MEASURE

6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency
personnel

As the product contains organic solvent which is highly flammable substance, remove all possible sources of ignition and thoroughly ventilate premises. Use personal protective equipment and keep away unprotected persons. Do not inhale fumes / gas / vapours / spray. Avoid skin and eye contact. See Sections 7 et 8.

6.2. Environmental precautions

Prevent product from entering drains or watercourses. Avoid subsoil penetration. If the product contaminates ground water, rivers or drains (or is likely to do so), notify the relevant authorities, following the statutory procedures.

6.3. Methods and materials for containment and cleaning up

Methods and materials

Clean up any spills as soon as possible, using a non-combustible absorbent material to collect it, for example:

sand, earth, vermiculite, diatomic earth. Collect material into suitable drums for disposal in accordance with regulations (see Section 13). It is preferable to clean with detergents, do not use solvents.

6.4 Reference to other sections

See Section 1 for emergency contact information. See Section 8 for information on appropriate personal protective equipment. See Section 13 for additional waste treatment information.

7. HANDLING AND STORAGE

7.1. Precautions for safe handling

Protective measures

Keep container tightly closed. Ensure adequate ventilation. Use personal protective equipment (see section 8). Avoid contact with the skin the eyes. Emergency eye wash fountains and emergency showers should be obtainable in the immediate vicinity. Handle empty containers with care because residual vapours are flammable. Dry residue stay highly flammable. Avoid naked flames or other sources of ignition in areas where product is used. No smoking. Fumes are heavier than air and they may spread at ground level and form explosive mixtures with air. Avoid the formation of explosive concentrations and concentrations above occupational exposure limits. Do not allow unauthorized persons into areas where product is used.

Technical protective measures

Provide proper grounding. Use only non-sparking tools. Do not use compressed air to either agitate or transfer the contents of storage containers (tanks) / shipping drums containing this material.

Avoid build-up of static charges by:

- ensuring that flooring is conductive and keeping it clean,
- ensuring that equipment is earthed during transfer or stirring of the product or preparations containing the product,
- use of antistatic shoes, clothing and packaging.

Hygiene measure Keep away from food, drink and animal feeding stuffs. Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

7.2. Conditions for safe storage

Requirements for storage areas and containers Store in tightly closed containers, in a cool, dry and well-ventilated place. Unsuitable working materials: various plastics. Keep in an area equipped with solvent resistant flooring. Keep away from direct sunlight, from heat or sources of ignition – No smoking. The vapour may be invisible, heavier than air and spread along ground. Vapours may form explosive mixtures with air. Take measures to prevent the build-up of electrostatic charge. Use only in an area containing explosion proof equipment.

7.3. Specific end uses

keep worker exposure to airborne contaminants below any recommended or statutory limits.

Individual protection measures

Hygiene measures

Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Respiratory protection

If vapour concentrations exceed the established exposure limits, respiration protection is necessary, wear a gas mask (A-P2) with appropriate cartridge.

Eye/face protection

Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles and/or face shield.

Hand protection

Use adapted gloves (in accordance with EN 374) to prevent skin contact and possible irritation.

Skin and body protection

Solvent resistant protective clothing.

Environmental exposure controls

Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

Personal hygiene

Minimize breathing of vapour. Avoid prolonged contact with skin. Wash hands and other exposed areas with mild soap and water before eat, drink or smoke and when leaving work. Changing of clothes at the end of work.

Environmental exposure controls

Prevent product from entering drains or watercourses. If product contaminates ground water, rivers or drains (or is
